

Hi Ian, I have found another bug in the platform of AI Powered English GYM, for example when I press "But" it will show 3But instead of the definition. Same problem when pressing "Biologists" as well as it will show 2Biologists instead.

I also found some bug in the AI English gym, when we pick challenger mode, we are not able to press the audio button. However, when we are in the normal mode, the audio button will be working normal.
