This is data issues. Program won't know which ; is final

Of course will break it down

So we need to check ;

Rather than just ; ?

Need instruction

IAN XIE YING I think this is very serious . You fix the image issue for half year still has bug

星期日 下午 08:01

it seems that if the "additional info" row is the same across multiple rows, it will appear multiple times in the target word
