some sentences have "," inside it.. in that case, there are more than 3
",", causing the list of sentences to be splitted at the wrong point.

for now, just skip the entire row if any four-sentence cell in that row has more than three ","

also, sometimes i feel like vocab module is not using cached image generated before and is generating new ones even though they are previously generated

for the same word, we will reuse the previously generated image. The judgment was strictly based on the word itself.

KELVIN CHEUNG MAN KIN 2026/5/17 下午 08:38

also, sometimes i feel like vocab module is not using cached image generated before and is generating new ones even though they are...

HILTON LAM MAU HONG 2026/5/17 下午 07:46

IAN XIE YING i think this is very serious . You fix the image issue for half year still has bug

checking

翻譯

i saw the image was generated. but the generation speed was a bit too slow, causing it to fail to load

HILTON LAM MAU HONG 星期日 下午 08:50 翻譯

HH

Not sure why but Zi Wei fix bug always in one go and will ask ai make a lot of adjustments. I think maybe promoting issue . Ai will consider many factors

星期日 下午 08:54

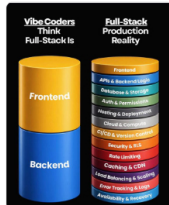

IAN XIE YING 2026/5/17 下午 08:50

i saw the image was generated. but the generation speed was a bit too slow, causing it to fail to load

Can we preload / pregenerate the image in the next vocab before it becomes visible to user ?

HILTON LAM MAU HONG 星期日 下午 08:54

Smart people will ask ai to transfer vibe code to the right hands side and clearly tell ai what need to do

翻譯

Then will make the feature perfect

翻譯

Seems our developer only will ask AI" help me write this function " done
