

tank, and has served on the international advisory board of Prime Minister José Zapatero of Spain, on the science board of the Santa Fe Institute, as president of the International Cognitive Linguistics Association, and on the governing board of the Cognitive Science Society, where he is now a fellow of the society. He has lectured at major universities in dozens of countries around the world. His current technical research is on the theory of how the neural circuitry of the brain gives rise to thought and language.

His blogs appear regularly on his website (www.georgelakoff.com) and at [*The Huffington Post*](#), [*Truthout*](#), [*AlterNet*](#), [*Common Dreams*](#), and [*Daily Kos*](#).
